DETAILED ACTION

1. Applicant's amendment, filed 11/12/03 is acknowledged.

Claims 67-72 are pending.

Restriction Requirement

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 67-69, drawn to a composition of highly pure polyclonal Th1 cell, classified in Class 424, subclass 577.
- II. Claims 70-72, drawn to a method of treating a disease, comprising infusing a composition of highly pure polyclonal Th1 cell classified in Class 424, subclass 577.

3. Groups I and II are related as product and process of using. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case a highly pure polyclonal Th1 cell can be used to produce conditioning media in addition to the methods of treating.

Species Election

4. Applicant is further required under 35 USC 121 (1) to elect a single disclosed species to which the claims would be restricted if no generic claim is finally held to be allowable and (2) to list all claims readable thereon including those subsequently added.

5. If Group II is elected, applicant is required to elect a specific disease wherein a specific disease is selected from the group recited in claim 71.

Art Unit: 1644

These species are distinct because a specific of treating a disease wherein a specific disease is selected from the group recited in claim 71 differ in etiologies and therapeutic endpoints of pathological conditions; thus each condition represents patentably distinct subject matter. The examination of species would require different searches in the scientific literature.

6. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

A telephone call was made to Laurie Hill on 08/04/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
